

TigerOptics -

Lights the way for
Oxygen Analysis!

Measure Trace Levels of O₂ — with no wet chemistry!

Tiger Optics, the leader in CRDS (Cavity Ring-Down Spectroscopy) introduces the LaserTrace O₂ — the first laser-based trace O₂ analyzer that detects ppt oxygen levels in ultra-high-purity gases.

- No wet chemistry
- No oxygen shock
- Wide dynamic range – 100 ppt to 2.5 ppm
- Multi-point capability – up to four sample lines
- Automatic self-verification
- No calibration required

O₂ analysis in a whole new light.
